PROFESSIONAL SUMMARY

Software Development Engineer with 3 years in React, React Native, HTML, CSS, JavaScript Agile methodologies, and version control systems. Skilled in designing and developing scalable web and mobile applications, as well as optimizing existing software for enhanced performance. Strong in problem-solving, collaborative teamwork, and effective cross-functional communication.

WORK EXPERIENCE

Software Development Engineer | Wallero Technologies | Hyderabad *July 2025 – Present*

- Developed **mobile and web application features using React Native and React.js**, contributing to food delivery and customer feedback platforms.
- Implemented **Google Maps integration with a custom draggable pointer** in the mobile app, enabling users to accurately select and update delivery locations.
- Integrated **GPS-based current location detection and reverse geocoding**, automatically retrieving location name and address for improved user experience.
- Captured **latitude and longitude coordinates from map selections** and auto-populated address fields in forms.
- Developed **customer feedback submission workflows**, including feedback forms, acknowledgements, and automated email notifications.
- Built **Business Admin portal modules** for managing products and customer submissions with pagination, search, filtering, and sorting.
- Implemented **Stripe payment gateway and subscription billing workflows**, including billing history, custom pricing plans, and Super Admin billing management.
- Developed **QR code generation, shopper-business messaging, and email campaign features**, enabling businesses to collect feedback and engage customers.
- Improved **application performance and UI/UX,** resolving scroll issues, optimizing map interactions, fixing iOS build problems, and improving web performance using Lighthouse audits.

Software Engineer | Edvenswa Tech | Hyderabad *August 2023 – July 2025*

- Developed **React Native mobile applications and React.js web portals** for healthcare, dealership management, and enterprise timesheet systems.
- Built features such as **doctor appointment booking, product e-commerce modules, employee timesheet tracking, enquiry management, and task workflows**.
- Implemented **Redux for global state management**, ensuring efficient data flow across complex application screens and modules.
- Integrated **third-party services including Razorpay payment gateway and Jira OAuth authentication** for secure transactions and automated task synchronization.
- Designed and developed **admin dashboards with analytics and reporting**, enabling better visibility into operational metrics and performance data.
- Built **responsive UI components and scalable frontend architecture**, ensuring consistent performance across mobile, tablet, and web platforms.
- Utilized **styled-components and Reactotron for UI maintainability and debugging**, improving development efficiency and application stability.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript, HTML5, CSS3, React Native, Tailwind CSS, Shadcn UI
Testing & Automation: Jest, Unit & Integration Testing
Backend & APIs: Node.js, Express.js, Python, Fast API, RESTful APIs
Databases: MySQL, MongoDB, PostgreSQL
DevOps & Tooling: Bitbucket, GitHub, Jira, Maven, Docker, Azure Devops
Cloud Technologies: AWS
Operating Systems: Windows, macOS, Linux
Application Servers: Nginx, IIS
AI Tools: GitHub Copilot, Claude Opus 4.6

EDUCATION

B.Tech in Computer Science | Swarna Bharathi Institute of Science and Technology | Telangana *2020 – 2023*
CGPA: 7.2 / 10.0

Diploma in Electrical and Electronics | Khammam Institute of Science and Technology | Telangana *2017 – 2020*
CGPA: 8.3 / 10.0

SSC | Indo English High School | Telangana *2017*
CGPA: 7.3 / 10.0

ACCOMPLISHMENTS

- Appreciated by Client for exceptional performance and consistency exceeding expectations.
- Received commendation from project manager for delivering a high-quality Proof of Concept (POC) that exceeded expectations in terms of performance, usability and code quality
- Recognised by manager and team lead for successfully delivering a critical module ahead of schedule, ensuring timely project delivery and maintaining high code quality.

CERTIFICATIONS

- AWS Cloud Practitioner by Amazon Web Services
- TCS Career Edge — Young Professional
- Internship on Frontend Development by IBM Skill Build
- Cloud Computing intern Certification — Solvency Software Solutions
